

HR Recruitment Information System

Project: HR Recruitment Information System Analysis

Company: NovaTech Solutions

Prepared by: Almirah Qureshi

1. System Requirements

1.1 Functional Requirements

The proposed HR Recruitment Information System should provide the following functional requirements:

ID	Functional Requirement
FR-01	The system shall allow candidates to create and manage their profiles.
FR-02	The system shall allow candidates to view available job vacancies.
FR-03	The system shall allow candidates to submit job applications online.
FR-04	The system shall allow candidates to track their application status.
FR-05	The system shall allow hiring managers to submit recruitment requests.
FR-06	The system shall allow HR managers to approve or reject recruitment requests.
FR-07	The system shall allow HR staff to create and publish job vacancies.
FR-08	The system shall store candidate and application information in a centralized database.
FR-09	The system shall allow HR staff to review and shortlist candidates.
FR-10	The system shall allow HR staff to schedule interviews.
FR-11	The system shall notify candidates and interviewers about scheduled interviews.
FR-12	The system shall allow interviewers to record interview feedback.
FR-13	The system shall allow authorized users to update candidate statuses.
FR-14	The system shall allow HR staff to create and manage job offers.
FR-15	The system shall record whether candidates accept or reject job offers.
FR-16	The system shall generate recruitment reports and performance information.
FR-17	The system shall maintain recruitment records for future reference.

1.2 Non-Functional Requirements

The system should also meet the following quality requirements:

Category	Requirement
Security	Only authorized users should access sensitive recruitment information.
Usability	The system should have a simple and easy-to-use interface.
Performance	The system should respond quickly to normal user requests.
Reliability	Recruitment data should be stored accurately and consistently.
Availability	The system should be available to authorized users during working hours.

Category	Requirement
Scalability	The system should support increasing numbers of candidates, vacancies, and applications.
Maintainability	The system should be easy to update and maintain.
Data Integrity	Candidate, application, interview, and hiring information should remain accurate and consistent.
Privacy	Personal candidate information should be protected from unauthorized access.

1.3 User Requirements

The system should support the needs of its major users:

- **Candidates:**
Create profiles, search vacancies, submit applications, track application progress, and respond to job offers.
- **HR Recruiters:**
Manage vacancies, review applications, shortlist candidates, schedule interviews, update candidate statuses, and prepare job offers.
- **Hiring Managers:**
Submit recruitment requests, review shortlisted candidates, and participate in candidate selection.
- **Interviewers:**
View interview schedules and record candidate evaluation and feedback.
- **HR Managers / Administrators:**
Approve recruitment requests, manage users, monitor recruitment activities, and generate reports.

1.4 System Requirements Summary

The proposed system should integrate recruitment activities into a **single centralized information system**. It should reduce dependence on spreadsheets, emails, and manually maintained records while improving data accuracy, process visibility, communication, and recruitment reporting.

1.5 Conclusion

The identified requirements provide a foundation for developing an HR Recruitment Information System that supports the complete recruitment lifecycle. By combining candidate management, vacancy management, application tracking, interview management, job offers, and reporting within one system, the organization can achieve a more structured, efficient, and transparent recruitment process.
